

Proposals for Space World Governance

By Jacques Blamont
Beijing, 24 April 2008

World Space Governance

Can Only Be Invented

By Considering

New Objectives

- **The Objectives**
- **The Doctrine**
- **The Roadmap**

I The Objectives (1)

- Science & Exploration (1)
 - Cooperation in robotic missions to the Moon and the Planets
 - R & D Joint Developments
 - Operations
 - Assets
 - GPS around the Moon & Mars
 - Telecom network around the Moon & Mars
 - International automatic stations and mobile laboratories on the Moon
 - Planetary Internet
 - Partnerships in Missions
 - Access to Space: Coordination for Launchers' Use

I The Objectives (2)

- Science & Exploration (2)

- **The International**

Manned

Moonbase

I The Objectives (3)

- Applications (1)
 - A Future Global Navigation System
 - After GPS, Glonass, Beidou, Galileo
 - A unified system for civilian use
 - A International Treaty (UN Sponsored)

I The Objectives (4)

- Applications (2)
 - Environmental Studies
 - Consolidation of GEO for the implementation of GEOSS through UN institutionalisation

II The Doctrine

- **A Wiki Paradigm**

- Advancing National Space Interests by globalizing & sharing
- Most advanced Nations to help, work with and participate in missions of others less knowledgeable
- Generosity pays

III A Road Map

- At this Summit meeting create a permanent structure:
- **An International Space Governance Forum**
 - In order to promote:
 - Concepts for new major ventures
 - Proposals of cooperation among Space Agencies
 - **Common Strategy of national partners in specific domains**
 - International Manned Moon Base as a symbol

Let us work on a

Beijing Declaration

endorsing these ideas
