

# Evaluating the Business Case for Nuclear Power

Thursday, July 31  
9:00 am – 12:00 pm  
CSIS B1 Conference Center  
1800 K Street, NW  
Washington, DC 20006

This session is part of an ongoing series of conferences that examine the role of nuclear energy as an option to meet urgent climate and energy needs. In this program, several panels of experts will offer analyses of the economics of nuclear power as well as discuss issues with financing a fleet of new reactors. A final panel will comment on the potential to scale some of the inputs necessary to support an expansion of nuclear power: human capital and the nuclear supply chain.

## Agenda

9:00 am – 9:05 am	<b>Welcome and Introduction</b> David Pumphrey, <i>CSIS</i>
